

CSS 3 Activity

1. Transforming Job Card on Hover:

In this activity, students will learn how to apply CSS3 transforms to create a card transformation effect when a job listing is hovered over.

Task: Create a job listing card that scales up slightly when hovered over.

2. Adding Transition Effects to Buttons:

This activity demonstrates how to apply transition effects to buttons when they are hovered over.

Task: Create buttons with transition effects for a smoother hover experience.

3. Animating Job Card Entrance:

This activity covers CSS3 animations by creating an animation for job cards as they enter the viewport.

Task: Animate job listing cards with a slide-in animation as they appear on the page.
